Fouji Foundation,

2017 – 2019

Marks: 850/1100

RESUME

My objective is to prepare myself to withstand in programming and front end development industry. I want to contribute in market by working on new and modern designs and layouts of websites and user friendly interface. I want to polish my abilities and skills by working in a healthy environment to stand out in the market.

EXPERIENCE

Frontend-Web-Developer at Softtechpanel | JAN 2021-March 2021

Intern-Carried out creative, user-friendly and responsive websites for clients by using latest language such as React.js, Html, CSS and Bootstrap.

Times Consultant Aug 2020 – Dec 2020

Intern – Carried out an extensive market research to create multiple datasets on North American Universities. Generated an outcome-oriented database for the prospective applicants. I analyzed the database to create most workable study options for South Asian students. I was awarded the best intern award for significantly improving the old database and carrying out an error-free research.
